S I R:

Under the provisions of 37 C.F.R. §1.501, the patent owner herewith makes the following prior art of record in the United States prosecution file:

United States Patent No. 6,137,290

United States Patent No. 5,189,370

United States Patent No. 5,072,182

The above references were cited in a Search Report rendered by the German Patent Office in connection with the counterpart German application on May 20, 2005, after the above application had been allowed. The references and the German Office Action were not received by the undersigned counsel for the Applicants until after the issue fee had been paid.

The above patents are cumulative to, and no more relevant than, the prior art made of record during prosecution of the United States application. Had these references been of record during prosecution of the United States application, they would not have resulted in any different claim language from the allowed and issued claim language.
